

```
package main
```

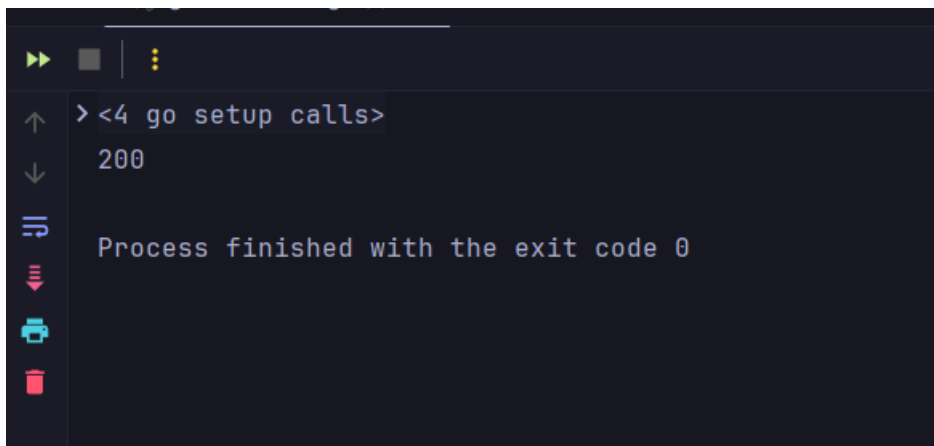

```
import "fmt"
```

Codeium: Refactor | Explain | Docstri

```
func main() { new *
```

```
    c := make(chan int, 1)
    c2 := make(chan bool, 1)
    value := 0
    go func() {
        value = 100
        c <- 42
    }()
    go func() {
        value = 200
        c2 <- true
    }()

    //value := <-c
    <-c2
    fmt.Println(value)
}
```

A terminal window with a dark background. The command prompt shows the command `> <4 go setup calls>` followed by the output `200`. Below this, a message states `Process finished with the exit code 0`. On the left side of the terminal, there is a vertical toolbar with icons for navigation (up and down arrows), search (magnifying glass), and other standard terminal functions.

```
> <4 go setup calls>
200

Process finished with the exit code 0
```

Repositorio:

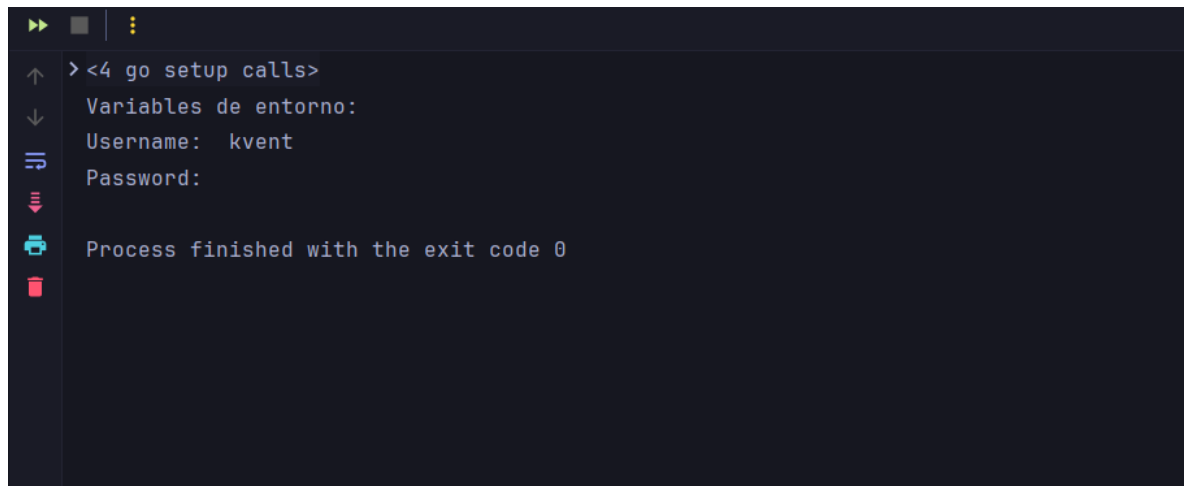

A code editor window with a dark theme. It contains Go code for a package named `main`. The code imports the `fmt` package and a configuration file from `github.com/QuinsZouls/practica-6/cmd/config`. The `main` function prints environment variables: `Variables de entorno`, `Username`, and `Password`, each followed by a comma and the corresponding configuration variable (`config.USERNAME` and `config.PASSWORD`). The code is color-coded: `package` is purple, `import` is purple, `func` is purple, `main` is yellow, `{` is yellow, `fmt.Println` is yellow, `a...` is yellow, `"Variables de entorno"` is yellow, `"Username"` is yellow, `config.USERNAME` is yellow, `"Password"` is yellow, and `config.PASSWORD` is yellow. The closing brace `}` is yellow. Above the code, there are three colored circles (red, yellow, green) and a toolbar with icons for `Refactor`, `Explain`, `Docstring`, and a close button `×`. Below the toolbar, there is a comment `* Alfredo Medrano *`.

```
package main

import (
    "fmt"
    "github.com/QuinsZouls/practica-6/cmd/config"
)

Codeium: Refactor | Explain | Docstring | ×
func main() { Alfredo Medrano *
    fmt.Println(a...: "Variables de entorno: ")
    fmt.Println(a...: "Username: ", config.USERNAME)
    fmt.Println(a...: "Password: ", config.PASSWORD)
}
```

```
><4 go setup calls>  
Variables de entorno:  
Username: kvent  
Password:  
  
Process finished with the exit code 0
```

A terminal window with a dark background. The left sidebar contains icons for navigation (up, down), search, and other functions. The main area shows the execution of a command, the resulting environment variables, and a confirmation message.
